J.P. Morgan Securities (China) Company Limited

4Q25 results do not settle the question of whether Tencent will emerge as the ultimate AI winner, but they do make the simple "Tencent is an AI loser" narrative much harder to sustain, in our view. The quarter showed AI monetization in existing operations, improving model capability, a broader agentic product strategy, a profitable and increasingly strategic cloud position, and a willingness to fund AI at scale from core cash flows. The important caveat is that none of this yet proves consumer-AI breakout or near-term EPS upside. It mainly proves that Tencent is still very much in the race and probably better positioned than the market's recent bearish AI narrative implied. At the same time, Tencent's 2026 earnings outlook becomes softer given management's guidance that investment in New AI Products will more than double in 2026. Overall, we believe that bearish positioning, multiple potential AI catalysts over the coming quarters, and undemanding expectations together offer attractive risk-reward on a 12-month view. Maintain OW with a new PT of HK$690.

The more constructive read is supported by more than just AI helping monetization in existing businesses, in our view. First, Tencent disclosed that it has revamped its model team and processes, improved data quality, rebuilt pre-training and reinforcement-learning infrastructure, and put HY 3.0 into internal testing ahead of an external rollout from April. Second, the company is clearly positioning beyond a pure chatbot race, with a broader strategy spanning Weixin AI, agentic services, WorkBuddy, Qclaw, SkillHub and cloud-based agent infrastructure. Third, Tencent Cloud has now become a real part of the AI thesis, with RMB5bn of adjusted operating profit in 2025 and management guiding to robust external cloud growth with solid profitability as GPU capacity steps up through 2026 and 2027.

The main trade-off is earnings timing, not strategic relevance. Tencent disclosed RMB18bn of New AI Product spending in 2025 and said this bucket should more than double in 2026. On our analysis, if the incremental spend remains largely pre-revenue, the margin drag could be around 2ppt. That said, we think this can be partially offset by continued mix shift toward higher-margin businesses such as ads, Weixin Search, Video Accounts and in-house games, as well as the benefit from Apple's recent China App Store commission cut. In other words, 2026 may be a year when revenue growth outpaces profit growth, but not necessarily one in which Tencent's earnings power deteriorates structurally.

The key risk, in our view, is that AI monetization in new products progresses more slowly than expected while reinvestment remains elevated, leaving Tencent with a better strategic narrative but delayed EPS upgrades and limited near-term rerating.

Summary Investment Thesis and Valuation

We view Tencent as a "fundamentals-plus-optionality" story into 2026: core engines (Weixin ecosystem, ads, and gaming) remain resilient, and we expect the AI narrative to matter more than incremental earnings revisions for share-price direction. Tencent has historically taken a measured, integration-first approach to new platform shifts, and we see its GenAI rollout as earlier-stage versus some peers in terms of visible model showcases and standalone app momentum because management appears to prioritize reliability, compliance, and ecosystem fit before scaling. That positioning leaves the stock less "AI-priced" in our view, which creates upside optionality if Tencent demonstrates clear execution and product-market fit in 2026.

Our Dec-26 PT of HK$690 is based on 21x 2026E P/E, at the top end of tier-1 Internet stocks' current consensus valuation range given Tencent's solid operations and the fact that it is well positioned to benefit from GenAI.

alex.yao@jpmorgan.com

Thesis reset: 4Q25 weakens the "AI loser" narrative, but 2026 becomes a year of reinvestment. Our key post-results takeaway is that Tencent's 4Q25 disclosure materially improves the quality of its AI narrative. The company is no longer asking investors to underwrite AI on promise alone. It is now showing AI contribution in core monetization, while also being explicit that 2026 will require heavier upfront investment in new AI products. Management quantified RMB18bn of spending on New AI Products in 2025 and guided to more than doubling that investment in 2026, framing it as strategic incubation rather than ordinary opex. On our analysis, if that incremental spend remains largely pre-revenue next year, the margin drag could be around 2ppt. Even so, we think that the headwind can be partially offset by two factors: first, continued mix shift toward higher-margin businesses such as ads, Weixin Search, Video Accounts and in-house games; and second, the earnings benefit from the recent iOS commission cut. Net-net, the results do not eliminate the near-term EPS trade-off, but they do make the medium-term Tencent AI case more credible, in our view.

Proof of AI monetization in the core: the AI story is already in the P&L. The most important evidence from the quarter, in our view, is that AI is already improving the economics of Tencent's existing businesses. Management tied AI to stronger ad targeting and conversion, better game content production and engagement, improved search monetization, stronger Video Accounts recommendation, lower credit losses in FinTech, and more capable enterprise SaaS products. This matters because it shifts the investor debate away from whether Tencent has a breakout chatbot and toward whether Tencent can keep converting AI into higher revenue quality and stronger monetization across its installed base. That is a much better place for Tencent to compete, given the scale and defensibility of its existing ecosystems.

Tencent Cloud as AI asset: pricing power is improving for structural, not just cyclical, reasons. Tencent Cloud is increasingly looking like an AI asset rather than an AI cost center. The business arm generated RMB5bn of adjusted operating profit in 2025 and pointed to robust external cloud growth, solid profitability and rising GPU capacity into 2026 and 2027. More importantly, management's commentary suggests Tencent Cloud's pricing power is improving for structural reasons. Demand is rising not only for GPU compute, but across CPU, memory, SSD and storage. At the same time, supply is increasingly booked out and concentrated with hyperscalers, making it harder for smaller customers to source infrastructure directly and pushing more demand toward scaled cloud platforms such as Tencent. In that environment, Tencent is not limited to passing through cost inflation. It also has scope to capture more value by moving customers from bare-metal infrastructure toward tokenized services, PaaS and SaaS, where pricing and margins are structurally better. We think this is a critical but still underappreciated part of the quarter.

2026 reinvestment and EPS trade-off: the question is no longer whether AI helps, but how much Tencent chooses to reinvest. The real 2026 debate, in our view, is not about AI relevance. It is about AI flow-through. Management has now explicitly separated the profit engine of the existing business from the upfront cost of incubating new AI products, and it has indicated that revenue may grow faster than profit if Tencent steps up investment as planned. That framing is sensible strategically, but it still matters for estimates. Tencent also said it will likely buy back fewer shares in 2026 than in 2025 in order to fund AI investment. As a result, 2026 is shaping up less as a margin-harvest year and more as a year in which strong core

cash flow funds a deliberate acceleration in AI spend. Investors should therefore focus less on whether Tencent can afford to invest, and more on whether the pace of reinvestment remains disciplined and productive.

Chatbot vs. agentic / decentralized AI form factor: Tencent is not betting on a winner-takes-all model monopoly. One of the most important strategic takeaways from the quarter is that Tencent is explicitly not positioning for a winner-takes-all chatbot or model monopoly. The company's message is that chatbot apps are only one entry point, and today overlap mainly with search. The larger opportunity lies in embedding AI into Weixin, Mini Programs, productivity tools, content, commerce and agentic workflows. Management went further on the call, arguing that AI is evolving toward a decentralized world in which multiple models coexist and applications choose across a price-performance curve rather than lock into a single dominant model. That framing plays directly to Tencent's strengths: orchestration, communication interfaces, Mini Program connectivity, payments, merchant relationships, and cloud/security infrastructure. Put differently, Tencent does not need Hunyuan to become the only model that matters in order to become an economic winner in AI, in our view.

What investors should track next: the next six months matter more than the quarter just reported. After 4Q25, we think investors should focus on a small number of forward indicators:

- Hunyuan 3.0 rollout and external reception will matter, because improved model capability is the foundation for better product experiences.
- Tencent needs to show that Yuanbao, Weixin AI and agentic tools can build sustained usage and monetizable user habits.
- Tencent Cloud needs to translate stronger demand and firmer industry pricing into continued external growth and profit as more capacity comes online.
- Ads momentum into 1Q26 needs to hold, especially as AI-driven targeting and Weixin Search monetization improve.
- The key estimate variable remains the balance between reinvestment and earnings flow-through. That is what will determine whether Tencent is valued as an AI monetization winner or remains trapped in a debate about investment intensity.

Estimate changes: we maintain 2026-27E topline forecasts relatively unchanged, but lower adj. NP by 7%/7% to reflect the accelerating reinvestment in the AI area. Our Dec-26 PT is revised to HK$690 from HK$750, still based on 21x 2026E P/E, maintain OW.

Investment Thesis, Valuation and Risks

Tencent *(Overweight; Price Target: HK$690.00)*

Investment Thesis

We view Tencent as a "fundamentals-plus-optionality" story into 2026: core engines (Weixin ecosystem, ads, and gaming) remain resilient, and we expect the AI narrative to matter more than incremental earnings revisions for share-price direction. Tencent has historically taken a measured, integration-first approach to new platform shifts, and we see its GenAI rollout as earlier-stage versus some peers in terms of visible model showcases and standalone app momentum because management appears to prioritize reliability, compliance, and ecosystem fit before scaling. That positioning leaves the stock less "AI-priced" in our view, which creates upside optionality if Tencent demonstrates clear execution and product-market fit in 2026.

Valuation

Our Dec-26 PT of HK$690 is based on 21x 2026E P/E, at the top end of tier-1 Internet stocks' current consensus valuation range, given Tencent's solid operations and the fact that it is well positioned to benefit from GenAI.

Risks to Rating and Price Target

Downside risks to our rating and PT include:

- Further regulatory tightening for games.
- A continued slowdown in the macro economy.
- Inability to launch successful mobile game titles continuously.
- A slower-than-expected ramp-up of mobile ad revenue.
- Video content spend.
- Higher-than-expected investments into new initiatives (e.g., Cloud and Internet finance) due to intensified competition, leading to margin pressure.

Upside risks include:

- Tencent to launch and monetize its new game titles in China.
- A better macro environment to support ads growth.
- Policy support in cloud, business service, etc.

Source: Bloomberg Finance L.P. and J.P. Morgan; price data adjusted for stock splits and dividends.
Initiated coverage Feb 07, 2010. All share prices are as of market close on the previous business day.

The chart(s) show J.P. Morgan's continuing coverage of the stocks; the current analysts may or may not have covered it over the entire period.
J.P. Morgan ratings or designations: OW = Overweight, N= Neutral, UW = Underweight, NR = Not Rated

Explanation of Equity Research Ratings, Designations and Analyst(s) Coverage Universe:
J.P. Morgan uses the following rating system: Overweight (over the duration of the price target indicated in this report, we expect this stock will outperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); Neutral (over the duration of the price target indicated in this report, we expect this stock will perform in line with the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe); and Underweight (over the duration of the price target indicated in this report, we expect this stock will underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe. NR is Not Rated. In this case, J.P. Morgan has removed the rating and, if applicable, the price target, for this stock because of either a lack of a sufficient fundamental basis or for legal, regulatory or policy reasons. The previous rating and, if applicable, the price target, no longer should be relied upon. An NR designation is not a recommendation or a rating. Some stocks under coverage have a rating but no price target; in these cases, we expect the stock will outperform/perform in line/underperform the average total return of the stocks in the Research Analyst's, or the Research Analyst's team's, coverage universe of the relevant duration of the region. In our Asia (ex-Australia and ex-India) and U.K. small- and mid-cap Equity Research, each stock's expected total return is compared to the expected total return of a benchmark country market index, not to those Research Analysts' coverage universe. If it does not appear in the Important Disclosures section of this report, the certifying Research Analyst's coverage universe can be found on J.P. Morgan's Research website, https://www.jpmorganmarkets.com.

Coverage Universe: Yao, Alex : Alibaba Group Holding Limited (9988.HK), Alibaba Group Holding Limited (BABA) (BABA), Alibaba Health (0241) (0241.HK), Autohome Inc (ATHM), Autohome Inc - H (2518.HK), Baidu.com (9888.HK), Baidu.com (BIDU) (BIDU), Damai Entertainment (1060.HK), DiDi Global Inc. J.P. Morgan Equity Research Ratings Distribution, as of January 01, 2026

	Overweight (buy)	Neutral (hold)	Underweight (sell)
J.P. Morgan Global Equity Research Coverage*	51%	37%	12%
IB clients**	47%	47%	35%
JPMS Equity Research Coverage*	49%	38%	13%
IB clients**	72%	70%	53%

*Please note that the percentages may not add to 100% because of rounding.
**Percentage of subject companies within each of the "buy," "hold" and "sell" categories for which J.P. Morgan has provided investment banking services within the previous 12 months.
For purposes of FINRA ratings distribution rules only, our Overweight rating falls into a buy rating category; our Neutral rating falls into a hold rating category; and our Underweight rating falls into a sell rating category. Please note that stocks with an NR designation are not included in the table above. This information is current as of the end of the most recent calendar quarter.

Equity Valuation and Risks: For valuation methodology and risks associated with covered companies or price targets for covered companies, please see the most recent company-specific research report at http://www.jpmorganmarkets.com, contact the primary analyst or your J.P. Morgan representative, or email research.disclosure.inquiries@jpmorgan.com. For material information about the proprietary models used, please see the Summary of Financials in company-specific research reports and the Company Tearsheets, which are available to download on the company pages of our client website, http://www.jpmorganmarkets.com. This report also sets out within it the material underlying assumptions used.

History of Investment Recommendations:
A history of J.P. Morgan investment recommendations disseminated during the preceding 12 months can be accessed on the Research & Commentary page of http://www.jpmorganmarkets.com where you can also search by analyst name, sector or financial instrument.

Analysts' Compensation: The research analysts responsible for the preparation of this report receive compensation based upon various factors, including the quality and accuracy of research, client feedback, competitive factors, and overall firm revenues.

Registration of non-US Analysts: Unless otherwise noted, the non-US analysts listed on the front of this report are employees of non-US affiliates of J.P. Morgan Securities LLC, may not be registered as research analysts under FINRA rules, may not be associated persons of J.P. Morgan Securities LLC, and may not be subject to FINRA Rule 2241 or 2242 restrictions on communications with covered companies, public appearances, and trading securities held by a research analyst account.

Other Disclosures

J.P. Morgan is a marketing name for investment banking businesses of JPMorgan Chase & Co. and its subsidiaries and affiliates worldwide.

UK MIFID FICC research unbundling exemption: UK clients should refer to UK MIFID Research Unbundling exemption for details of J.P. Morgan's implementation of the FICC research exemption and guidance on relevant FICC research categorisation.

All research material made available to clients are simultaneously available on our client website, J.P. Morgan Markets, unless specifically permitted by relevant laws. Not all research content is redistributed, e-mailed or made available to third-party aggregators. For all research material available on a particular stock, please contact your sales representative.

(Taiwan) Limited, subject to the license scope and the applicable laws and the regulations in Taiwan. **To the extent that J.P. Morgan Securities (Taiwan) Limited produces research materials on securities not listed on the Taiwan Stock Exchange or Taipei Exchange ("Non-Taiwan Listed Securities"), these materials shall not constitute securities recommendations for the purpose of applicable Taiwan regulations, and, for the avoidance of doubt, J.P. Morgan Securities (Taiwan) Limited does not act as broker for Non-Taiwan Listed Securities.** According to Paragraph 2, Article 7-1 of Operational Regulations Governing Securities Firms Recommending Trades in Securities to Customers (as amended or supplemented) and/or other applicable laws or regulations, please note that the recipient of this material is not permitted to engage in any activities in connection with the material that may give rise to conflicts of interests, unless otherwise disclosed in the "Important Disclosures" in this material.
Thailand: This material is issued and distributed in Thailand by JPMorgan Securities (Thailand) Ltd., which is a member of the Stock Exchange of Thailand and is regulated by the Ministry of Finance and the Securities and Exchange Commission, and its registered address is 3rd Floor, 20 North Sathorn Road, Silom, Bangrak, Bangkok 10500.
UK: Research is produced in the UK by J.P. Morgan Securities plc ("JPMS plc") which is a member of the London Stock Exchange and is authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority or J.P. Morgan Markets Limited ("JPMML Ltd") which is authorised and regulated by the Financial Conduct Authority. Unless specified to the contrary, this material is distributed in the UK by JPMS plc and is directed in the UK only to: (a) persons having professional experience in matters relating to investments falling within article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) (Order) 2005 ("the FPO"); (b) persons outlined in article 49 of the FPO (high net worth companies, unincorporated associations or partnerships, the trustees of high value trusts, etc.); or (c) any persons to whom this communication may otherwise lawfully be made; all such persons being referred to as "UK relevant persons". This material must not be acted on or relied on by persons who are not UK relevant persons. Any investment or investment activity to which this material relates is only available to UK relevant persons and will be engaged in only with UK relevant persons. A description of J.P. Morgan EMEA's policy for prevention and avoidance of conflicts of interest related to the production of Research can be found at the following link: J.P. Morgan EMEA - Research Independence Policy.
U.S.: J.P. Morgan Securities LLC ("JPMS") is a member of the NYSE, FINRA, SIPC, and the NFA. JPMorgan Chase Bank, N.A. is a member of the FDIC. Material published by non-U.S. affiliates is distributed in the U.S. by JPMS who accepts responsibility for its content.

General: Additional information is available upon request. The information in this material has been obtained from sources believed to be reliable. While all reasonable care has been taken to ensure that the facts stated in this material are accurate and that the forecasts, opinions and expectations contained herein are fair and reasonable, JPMorgan Chase & Co. or its affiliates and/or subsidiaries (collectively J.P. Morgan) make no representations or warranties whatsoever to the completeness or accuracy of the material provided, except with respect to any disclosures relative to J.P. Morgan and the Research Analyst's involvement with the issuer that is the subject of the material. Accordingly, no reliance should be placed on the accuracy, fairness or completeness of the information contained in this material. There may be certain discrepancies with data and/or limited content in this material as a result of calculations, adjustments, translations to different languages, and/or local regulatory restrictions, as applicable. These discrepancies should not impact the overall investment analysis, views and/or recommendations of the subject company(ies) that may be discussed in the material. Artificial intelligence tools may have been used in the preparation of this material, including assisting in data analysis, pattern recognition, and content drafting for research material. J.P. Morgan accepts no liability whatsoever for any loss arising from any use of this material or its contents, and neither J.P. Morgan nor any of its respective directors, officers or employees, shall be in any way responsible for the contents hereof, apart from the liabilities and responsibilities that may be imposed on them by the relevant regulatory authority in the jurisdiction in question, or the regulatory regime thereunder. Opinions, forecasts or projections contained in this material represent J.P. Morgan's current opinions or judgment as of the date of the material only and are therefore subject to change without notice. Periodic updates may be provided on companies/industries based on company-specific developments or announcements, market conditions or any other publicly available information. There can be no assurance that future results or events will be consistent with any such opinions, forecasts or projections, which represent only one possible outcome. Furthermore, such opinions, forecasts or projections are subject to certain risks, uncertainties and assumptions that have not been verified, and future actual results or events could differ materially. The value of, or income from, any investments referred to in this material may fluctuate and/or be affected by changes in exchange rates. All pricing is indicative as of the close of market for the securities discussed, unless otherwise stated. Past performance is not indicative of future results. Accordingly, investors may receive back less than originally invested. This material is not intended as an offer or solicitation for the purchase or sale of any financial instrument. The opinions and recommendations herein do not take into account individual client circumstances, objectives, or needs and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. This material may include views on structured securities, options, futures and other derivatives. These are complex instruments, may involve a high degree of risk and may be appropriate investments only for sophisticated investors who are capable of understanding and assuming the risks involved. The recipients of this material must make their own independent decisions regarding any securities or financial instruments mentioned herein and should seek advice from such independent financial, legal, tax or other adviser as they deem necessary. J.P. Morgan may trade as a principal on the basis of the Research Analysts' views and research, and it may also engage in transactions for its own account or for its clients' accounts in a manner inconsistent with the views taken in this material, and J.P. Morgan is under no obligation to ensure that such other communication is brought to the attention of any recipient of this material. Others within J.P. Morgan, including Strategists, Sales staff and other Research Analysts, may take views that are inconsistent with those taken in this material. Employees of J.P. Morgan not involved in the preparation of this material may have

investments in the securities (or derivatives of such securities) mentioned in this material and may trade them in ways different from those discussed in this material. This material is not an advertisement for or marketing of any issuer, its products or services, or its securities in any jurisdiction.

Confidentiality and Security Notice: This transmission may contain information that is privileged, confidential, legally privileged, and/or exempt from disclosure under applicable law. If you are not the intended recipient, you are hereby notified that any disclosure, copying, distribution, or use of the information contained herein (including any reliance thereon) is STRICTLY PROHIBITED. Although this transmission and any attachments are believed to be free of any virus or other defect that might affect any computer system into which it is received and opened, it is the responsibility of the recipient to ensure that it is virus free and no responsibility is accepted by JPMorgan Chase & Co., its subsidiaries and affiliates, as applicable, for any loss or damage arising in any way from its use. If you received this transmission in error, please immediately contact the sender and destroy the material in its entirety, whether in electronic or hard copy format.
